Oil Skimmers

Oil skimming systems

The industry leader in conventional and advanced gas cleaning and recovery technologies for more than 40 years. From initial inquiry and on-site evaluation, through engineering design, manufacture, installation, and start-up, Bionomic partners with our customers' every step of the way to ensure pollution problems and compliance issues are completely solved whether particulate, mist, aerosol or odor causing pollutants.

quick facts

- Dry collectors
- Wet scrubbers
- Packaged scrubber systems
- Electrostatic precipitators
- Bio-scrubbers/filters

applications

- Dust and particulate scrubbing
- Dust and particulate collection
- Acid gases
- NOX control
- Mercury removal
- Biological treatment of:
 - Gaseous organic compounds
 - Waste heat recovery
 - Chemical recovery and production

industries

- Mining
- Chemical
- Pharmaceutical
- Plastics
- Food
- Energy
- Pulp & Paper
- Hazardous Waste
- Wastewater
- Biomass
- ...and more

More Info

FLOATING TUBE OIL/WATER SEPARATORS

The leading manufacturer of oil skimmers and oil removal systems, specializing in recovering all types of floating waste oils, greases and fats from water surfaces. Featuring a free-floating collector tube that is oleophilic and hydrophobic, water collection is minimized and obstructions in the tank are not an issue and waste oil can be converted from a liability to a salable commodity.

quick facts

- 1 - 200 gph oil collection
- Vertical Lift: Over 150'
- Simple DIY installations
- Complete tanks /transfer systems

applications

- Cooling waterS
- Sumps
- Collection tanks
- Lift stations
- Hydrocarbons
- Wash facilities
- Sewer lines
- Pairing existing oil/water separators to increase efficiency

industries

- Biodiesel
- Chemical
- Food & Beverage
- Fuel Distribution
- Metal Machining
- Mining
- Petrochemical
- Power Generation
- Railroad
- Truck and equipment wash
- Auto dismantling
