For the last 40 years Cogeim has been a leading worldwide supplier of solid - liquid separation and vacuum drying equipment to the pharmaceutical, fine chemical and chemical industries. They hold ISO:9001 certification and specialize in using high quality construction materials such as stainless steels and special nickel based alloys.

## quick facts

Solid / Liquid Separations  
Nutsche & Leaf Filtration  
Pressure filter dryers  
Rotopress  
Thermal separations  
Evaporation  
Crystallizing  
Thin film drying  
Neutralization  
Hydrogenation  
Chlorination  
Polyacrylonitrile  
Fermentation  
Polycondensation  
Wet oxidation

## applications

Active pharmaceutical ingredients  
(API & HAPI)  
Agrochemical  
Extractions  
Purification  
Convention drying  
Drying filtered cakes  
Alcohol  
Bulk chemicals  
Pharmaceuticals  
Foods  
Essences  
Fragrances  
Aromas  
Flavors  
Waste and sludge treatment  
Pyrolysis  
Thermal desorption  
Biofuels

Chemical

The most comprehensive line of industrial filtration technologies available from a single source. Durco Filters pressure leaf filters, filter presses, pressure nutsches, self-cleaning tubular filters and sludge dryers are deployed worldwide in the most demanding applications and environments. Proven technologies, years of application experience and the flexibility to engineer complete filtration systems that fit our customer's unique application requirements.

### quick facts

- Filter presses
- Pressure leaf filters
- Tubular backwash filters
- Sludge dryers
- Pressure Nutsche filters
- Flowrates: up to 5,000 gpm
- Loading: <200 ppm to 30% / wt

### applications

- Amines
- Biodiesel
- Color-alkali
- Molten sulfur
- Metal hydroxides
- Sludge cakes
- Solvent removal
- Acids
- Bases
- Solvents
- Oils & Pigments
- Catalysts
- Brines & Resins
- Propellants/explosives
- Scrubber sludge
- Fermentation pre-filters
- Municipal water

### industries

- Chemical
- Food & beverage
- Mining
- Waste water
- Metals
- Pulp & Paper
- Energy
- Toiletries and cosmetics
- Biofuels
